

We are passionate about delivering healthcare for our entire community. But more than that, we believe everyone we work with deserves a true sense of comfort and trust. What we do is not just a business; it is our calling. That's one reason our name is "Assured." We are a promise.

What We Believe In

You will discover that Assured Healthcare is different from any home care provider you know. We are not merely delivering home medical care. We believe our patients and their families deserve to be treated like treasured members of our own family. They deserve peace of mind, compassion and devotion. We believe that doing what is right is the only way to conduct life – and business.

Contact Us

Call us. E-mail us. Visit our website. You will soon see who we are. If you or a loved one needs private duty nursing at home, the call will be among the most important you can make.

Assured Healthcare, LLC

From Our Customers

"I have been able to take control of my life again with the assistance of your company and your wonderful employees... We look forward to the future with your company."

"Both my son and I have been extremely pleased. It gives me great peace of mind, knowing that he is in good hands... with Assured Healthcare he has had continuity of care... they provide excellent staffing care."

"We are very happy with the services that Assured Healthcare has provided in taking care of my mother. Whenever we have had questions or concerns, they've always provided the answers we needed to assist in making decisions about her care... Assured Healthcare has medical professionals available beyond the caregiving level that my mother needs right now. It's possible that in the future she may require medical staffing assistance. Because Assured Healthcare is full service, we can stay with them if things progress to that level and know that they will be able to provide people with those skills. We won't have to switch and start over with another company."

From An Employee

At Assured Healthcare, we feel that the happiness and satisfaction of our employees is directly reflected in the high level of care they provide. One of our employees recently wrote to us, saying:

"...Assured Healthcare is a premiere professional staffing agency, especially in the northeastern Illinois area. It is with gratitude that I express my sincere appreciation and sentiment for allowing me to be a member of your team..."

We Can Help

Health can be fragile. And when we are struck by illness or accident, or when age begins to sap at the endurance of an older loved one, even the strongest family will need a strong arm and a caring heart to see them through. That's why home care is not merely a product for us; it is the way caring people should treat one another.

If now is the time to bring a wonderful professional into the home to help, your choice will seldom be more important.

Our nurses, therapists and technicians are special people who are trained in every aspect of home-based care.

- We help seniors with age-related infirmities;
- We help surgical recovery patients of any age;
- We help new mothers and infants;
- We help children, teenagers and adults with physical challenges;
- We help persons with chronic illness;
- We help patients who need in-home rehabilitation;
- We help those who need any care for any reason as long as they need it.

Building A Great Staff

The test of a healthcare staff is the process used to build it. Ours is rigorous and sophisticated. We not only screen our staff for the highest level of skill, we match each one with his or her best environment.

All of our employees have had an in-depth personal interview, complete background check and drug screen. We trace their entire work history. This not only validates their work history; it establishes their qualities as partners. We not only seek highly skilled professionals, we seek good people who deserve your trust.

Our Services

Assured Healthcare has a team of skilled, professional healthcare employees standing ready to provide service at home:

- Registered Nurses and Licensed Practical Nurses
- Physical Therapists
- Phlebotomists (for blood draws)
- Certified Nursing Assistants

We also help our patients with personal care, light housekeeping, meal preparation, shopping, laundry, and all the tasks that need to be done so they can concentrate on getting well.

Coming To Your Home

Before we join the family as healthcare partners, we have work to do:

- Our registered nurse visits the home to learn more about the patient and the home environment;
- We contact the patient's doctor to assess treatments and special medical needs;
- We develop a detailed medication list to be kept in the home for review by you and your healthcare partner;
- We develop a detailed plan of care in advance for the healthcare employee in the home;
- We create a patient chart so the healthcare professional can make regular notations, updates and documentation of any notable events.

Call (847) 775-7445 to discuss your home care staffing needs today.
