## You Have Questions? We Have Answers

*Q: Our company is always short of quality nurses and office staff that understands medical billing. Can you help?*

A: We offer qualified, professional healthcare staffing for every need. We know billing systems and rules. We know why occupational and employee health departments have different requirements than municipalities, schools, hospitals, medical and dental practices. We know stringent laboratory protocols for research. We tailor our services to meet your commercial, institutional and home care needs.

*Q: Will we have to train your nurses and office staff?*

A: We take care of everything. Our screening offers rigorous in-depth interviews, résumé and work history review, license verification, two reference checks, drug screening and background check, verification of annual physical and vaccination requirements, negative TB or chest x-ray, current CPR and all additional certifications. Our training includes workplace orientation so every Assured professional knows the job perfectly. We supply training to handle Bloodborne Pathogens (BBP) / Hazard Communication (HAZCOM), as well as instruction in proper lifting techniques and response in case of accident, illness or injury. When our staff enters your business or institution, they are ready to work.
