Our Experience Counts And Yours Does, Too

Our staffing coordinators and recruiters have more than 20 years of combined healthcare staffing experience. We have the knowledge and background to successfully assess and match your skills to the right job. You want to work 8 hours a week? Or 40? You're a wiz at case management? You want to treat children in a school setting or assist new moms at home?

Getting To Know You

You can be confident that your skills, qualifications and job interests will be carefully assessed. Our screening process includes an in-depth interview, résumé and work history review, license check, two job reference checks, drug screening and background check, verification of annual physical and vaccination requirements, negative TB, current CPR and all additional certifications.

Your training includes workplace orientation to familiarize you with the customers and workplaces where you might serve. We offer Bloodborne Pathogens (BBP) and Hazard Communication (HAZCOM) training, as well as instruction in proper lifting techniques and response in case of accident, illness or injury.

And even more important, we work to know who you are as a person.
